
® Genapol BE 2810

Low foaming nonionic surfactant for the detergent industry

Composition

Coconut fatty alcohol ethoxylate butylether
with 10 EO
butyl endcapped

Product properties ^{*)}

Concentration [%]
approx. 85

Appearance

clear liquid

pH value , 1% active substance in water

5.0 – 8.0

Hazen colour

150 max.

Hydroxyl number conc. product [mg KOH/g]

max. 10

Water content (Karl Fischer method) [%]

14.0 – 16.0

Application

Genapol BE 2810 is especially suitable for the manufacture of low foaming cleaners and rinse aids for automatic dishwashing.

Storage

Genapol BE 2810 can be stored for at least to 2 years in original sealed containers at room temperature under the recommended conditions.

Protect from exposure to cold during transport and storage. The properties of Genapol BE 2810 are **reversibly altered** by exposure to cold. Genapol BE 2810 becomes turbid, thickens or freezes through exposure to cold, thaw slowly at room temperature and afterwards stir briefly.

This information is based on our present state of knowledge and is intended to provide general notes on our products and their uses. Therefore it should not be construed as guaranteeing specific properties of the products described on their suitability for a particular application. Any existing industrial property rights must be observed. The quality of our products is guaranteed under our General Conditions of Sale.

^{*)} These characteristics are for guidance only and should not be taken as product specifications. The tolerances are given in the product specification sheet. For further information on product properties, specifications, toxicological, ecological and safety data, please refer to the MSDS.
