## ® Genapol C 200

Nonionic surfactant for the detergent industry

---

### Composition

Coconut fatty alcohol polyglycol ether  
with 20 mol EO

### Product properties <sup>\*)</sup>

**Concentration [%]**  
approx. 100

**Appearance at 20°C**  
white wax-like

**Dilutability at 20°C, 1% aqueous**  
clear

**Density at 50°C [g/cm<sup>3</sup>]**  
approx. 1.03

**pH value ( 1 % active substance in water)**  
6.0 – 8.0

### Cloud point [°C]

1g in 100 ml 10% NaCl solution  
76 - 78

### Flash point [°C]

> 250

### HLB value

about 16

### Application

Emulsifier and solubilizer for hydrophobic active ingredients and perfume oils, special cleaning agents

### Storage

Genapol C 200 can be stored for at least to 2 years in original sealed containers at room temperature under the recommended conditions.

Protect from exposure to cold during transport and storage. The properties of Genapol C 200 are **reversibly altered** by exposure to cold. Genapol C 200 becomes turbid, thickens or freezes through exposure to cold, thaw slowly at room temperature and afterwards stir briefly.

This information is based on our present state of knowledge and is intended to provide general notes on our products and their uses. Therefore it should not be construed as guaranteeing specific properties of the products described or their suitability for a particular application. Any existing industrial property rights must be observed. The quality of our products is guaranteed under our General Conditions of Sale.

<sup>\*)</sup> These characteristics are for guidance only and should not to be taken as product specifications. The tolerances are given in the product specification sheet. For further information on product properties, specifications, toxicological, ecological and safety data, please refer to the MSDS.
