
Genapol[®] LA 030

Thickener for surfactant systems

Composition

C12/16 fatty alcohol polyglycol ether with 3 mol EO

INCI name Laureth-3

CAS No. 68551-12-2

Product properties ^{*)}

Appearance (20°C) liquid

Chemical and physical data:

Aqueous solution at 20°C turbid

pH value 5% a.i. in water/ethanol 1:1 6.0 – 8.0

active content (%) approx. 100

Hazen colour max. 130

HLB value 8

Cloud point (°C) 53.0 – 55.00

(5g in 25g 25% BDG-solution)

Application

Genapol LA 030 is used as a thickener for surfactant systems as shampoos, shower gels and liquid soaps.

Storage

Genapol LA 030 can be stored for at least two years in original sealed containers at room temperature.

Further information on handling, storage and dispatch is given in the EC safety data sheet.

This information is based on our present state of knowledge and is intended to provide general notes on our products and their uses. It should not therefore be construed as guaranteeing specific properties of the products described on their suitability for a particular application. Any existing industrial property rights must be observed. The quality of our products is guaranteed under our General Conditions of Sale.

^{*)} These characteristics are for guidance only and not to be taken as product specifications. The tolerances are given in the product specification sheet. For further product properties, specifications, safety and ecological data, please refer to the MSDS.
